Contents

1	Introduction	3
2	Elementary optimal control	4
2.1	Optimal control of a classical magnetic system	4
2.2	Optimal control for a classical system	5
2.3	Gradient-based optimal quantum control with the GRAPE algorithm	8
2.4	The Krotov algorithm	12
2.5	Modern numerical issues	12
3	Applied optimal quantum control	16
3.1	Closing the loop for polar molecules	17
3.2	GRAPE	18
3.3	GOCT	19
3.4	Evaluating fidelity with randomized benchmarking	20
3.5	Approximating time constraints with the Magnus expansion	24
3.6	Real-world limitations	26
